

Editorial- 3D Meetings & Trips

The French Stereo Club met the Club Niépce Lumière (CNL), a friendly association of photo and movie camera collectors in Auvergne in May 2023. During this meeting we shared our passions during 3D screening sessions, technical workshops and an exhibition featuring hundreds of stereoscopic views.

During the First international stereoscopic image meeting in Bordeaux from May 11 to 13, 2023, our members Patrick Durand and Pascal Peyrot presented an exhibition of stereoscopic devices from their collections, Michèle Bonnet exhibited Maurice Bonnet's Quest for Relief, and we were able to admire the magnificent lenticular works of our friends Pierre Allio and Henri Clément.

On the occasion of the third Festival of the Association "Intégrale Image" in Gaillac, on July 8 and 9, 2023, the SCF held its own stand, Didier Chatelard presented his exhibition of anaglyphs on myxomycetes, and Michèle Bonnet, the Quest for relief.

In November 2023, we were able to admire an impressive exhibition of stereoscopes organized by the Ionomécaphiles du Limousin in Sablé-sur-Sarthe.

The third Franco-Catalan Stereo Meetings took place in Barcelona from February 5 to 11, 2024. We were able to visit the two exceptional collections concerning stereoscopy by Carles Moner and Jesus Fernandez, as part of a tour of the city's gastronomic and photographic delights.

The Gaillac Stereoscopic Meetings organized by the Intégrale Image association took place on the theme of chromatic relief on April 6 and 7, 2024. The SCF, Didier Chatelard and Michèle Bonnet contributed greatly to it, once again.

Half a dozen members of the SCF, at the invitation of Frank Lorenz, President of the Deutsche Gesellschaft für Stereoskopie (DGS), attended its annual congress in Regensburg from 21 to 24 June 2024.

On the occasion of the European Heritage Days 2024, the SCF organised a public screening on 21 September 2024 in the large auditorium of our partner, the Médiathèque du Patrimoine et de la Photographie in Charenton-le-Pont.

The SCF took part in the Courant 3D international festival in Angoulême, from 7 to 13 October 2024, a key event for innovation in the field of immersive images and 3D.

We just returned from our sightseeing, gastronomic and stereoscopic excursion to Dieppe, for the Herring and Scallop Fair on 16 and 17 November 2024. It enabled us to take photos of the Dieppe museum ivory collection in excellent conditions.

We should also mention all the events organised by our members or in which they took part in Bièvres, Chelles, Arles, Bourg-lès-Valence, Saint-Sever, Soulac, Barbotan-les-Thermes, Gruissan, Blanquefort, Privas and Tourette-Levens. And I'm probably forgetting a few members who volunteered for the SCF.

So far three escapes are planned for 2025:

- The fifth Franco-Catalan meeting at Molitg-les-Bains (mid-March 2025), with a tourist programme proposed by Jean-François Thiry (photos taken from the historic Train Jaune and in the medieval village of Villefranche, etc.) and a festival of stereoscopic projections;

- Underwater photography at the Medes Islands in Catalonia (17-20 September 2025), with a tourist and gastronomic programme.

To ensure the smooth organisation of these two events, please let me know as soon as possible if you would like to attend (places are limited!);

- The 3D stereoscopic meeting in Alsace will take place on 19 and 20 April 2025 in Wihr-au-Val. It's a true 3D festival of, which was presented to you in the October Newsletter. You can still book your room at the Hotel Deybach (03 89 77 32 71), specifying that you are an SCF member.

We look forward to seeing you there!

Patrick Demaret, SCF Chairman
